CORNEAL EVALUATION FOR CONTACT LENSES

For contact lens wearers, a corneal evaluation must be performed yearly to evaluate the eye health and update the contact lens prescription. This fee is additional to the eye exam for glasses. If you are unsure if this fee is a covered benefit under your insurance, please ask us.

The fees are as follows:

New fitting (New patient or new lens)

Daily wear, extended wear and disposable spherical	\$60.00
Rigid Gas Permeable	\$80.00
Toric and monovision	\$90.00
Bifocal	\$120.00
Medical/Specialty lens	\$300.00

Returning patients updated to the same lens

Daily wear, extended wear and disposable spherical	\$50.00
Rigid Gas Permeable	\$60.00
Toric and monovision	\$60.00
Bifocal	\$90.00
Medical/Specialty lens	\$175.00

This fee will include trial lenses in most cases and any follow-up visits necessary to complete the contact lens prescription. The follow-up visits are used for any adjustments such as power changes, product compatibility, and comfort issues. All of this is included as part of our guaranteed contact lens program. **Follow-up visits must be completed within 30 days of dispensing contact lenses to avoid any additional fees.**

Contact lens prescriptions are valid for one year or per doctor's discretion.

YOUR RESPONSIBILITY:

Failure to return for a follow-up exam may jeopardize the health of your eyes. It is your responsibility to reschedule any follow-up visits that have been cancelled. No refunds will be extended for professional services.
